To Our Valued Customers:

At Conagra Brands, customer satisfaction with our products and service is a top priority. We are committed to active mitigation in situations where our ability to service may be compromised.

One of Conagra's production facilities has experienced an interruption that has impacted finished goods inventory. Some of the product may not meet Conagra's high-quality standards due to a potential can defect with the can lid on select Armour Vienna Sausage and Potted Meat items. This has resulted in immediate supply outages for select Armour SKUs. While not all items have been impacted by the potential can lid defect, additional items will be placed on allocation effective immediately to optimize service across the Vienna Sausage and Potted Meat portfolio.

Any immediate merchandising activity cannot be supported. Conagra is focused on active mitigation and will communicate once updates are available.

Following SKUs will experience a supply outage effective immediately:
